

Year 5

This half term, Year 5 have been lost in space. We have researched the planets using AR technology to bring the planets to Earth. Through our reading of Cosmic, the children have written a diary and a cold narrative describing space.

As it is the anniversary of the Moon Landing, children have had an experience day, that took them back into the sixties. They have looked in detail at the moon landing and discussed the differences between real newspaper articles and conspiracy theories, all to prep them for writing their own newspaper.

A group of children, who are a part of the Ethos Group at school, had the pleasure of joining three other schools on the Wirral for a residential, at Barnstondale. They learned resilience and built relationships with children, by applying their Christian values.
